

DATASHEET

WATER-FED POLES

ALIGATOR™ ALUMINIUM RANGE

The ALIGATOR is the latest generation aluminium water fed pole from Brodex. The pole is substantially upgraded, with lower weights compared to the previous range, but stronger with increased rigidity.

ALIGATOR Water Fed Pole - Aluminium

The ALIGATOR is the latest generation aluminium water fed pole with an overhaul of upgrades since our previous range of poles. We have been manufacturing aluminium poles for many years giving us a wealth of experience in the quality changes involved.

The ALIGATOR range is our strongest and lightest alloy pole yet. We have also reduced the collapsed length to our previous range, and with the new 'Anti-Pinch' clamps we believe this is the best alloy pole on the market.

SPECIFICATIONS

Reach	21ft	26ft	35ft
Sections	5	6	7
Weight	1.6kg	2.00kg	2.8kg
