

DATASHEET

WATER-FED POLES

The NEW **RAPTOR** is the latest generation of carbon-fibre water fed poles from Brodex. The pole is substantially upgraded ultra-lightweight in full carbon, with new robust anti-pinch lateral clamps.

RAPTOR Water Fed Pole - Carbon-Fibre

The **RAPTOR** is the lightest but strongest pole we have ever manufactured. This combined with our new improved clamping system makes it one of the best in the market.

The integrated PU sleeve inside the clamp body will reduce spin in the sections with a greater locking strength. This will massively improve the lifetime of the pole, due to a reduction in wearing.

1 YEAR
GUARANTEE

10" Lightweight Brushhead

Hose fed through pole

New "Anti-Pinch" clamps

More sections for smaller collapsed length

Premium Grade Carbon-Fibre
