

DATASHEET

WATER-FED POLES

The NEW **RAPTOR** is the latest generation of carbon-fibre water fed poles from Brodex. The pole is substantially upgraded, lightweight in a 50/50 carbon and glass fibre mix, with new robust anti-pinch lateral clamps.

RAPTOR Water Fed Pole - Hybrid Carbon/Glass Fibre Mix

The **RAPTOR** is our latest mid range light, but rigid water fed pole. With our new improved clamping system, the **RAPTOR** Hybrid is one of the best in the market. We have made extra efforts to improve your efficiency when using our poles, with our brand new anti-pinch clamps.

Compared to our old lever style clamps, our new ones are quicker and easier to operate, whilst also maintaining their durability. These clamps eliminate the worry of pinching, compared to other poles on the market.
