

DATASHEET

WATER-FED POLES

The NEW **RAPTOR** is the latest generation of carbon-fibre water fed poles from Brodex. The pole is substantially upgraded, lightweight in a 50/50 carbon and glass fibre mix, with new robust anti-pinch lateral clamps.

RAPTOR Water Fed Pole - Hybrid Carbon/Glass Fibre Mix

The **RAPTOR** is our latest mid range light and rigid water fed pole. With our new improved clamping system, the **RAPTOR** Hybrid is one of the best in the market.

The integrated PU sleeve inside the clamp body will reduce spin in the sections with a greater locking strength. This will massively improve the lifetime of the pole, due to a reduction in wearing.

SPECIFICATIONS

Reach	21ft	25ft	30ft
Sections	4	5	6
Weight	1.08kg	1.42kg	1.8kg
Collapsed Length	4.94ft	4.99ft	5.24ft

**1 YEAR
GUARANTEE**
